October 8, 2007

COLD CHAMPAGNE ONBOARD THE PRINCESS IOLANTHE IN MONACO BOTTLER AGREES: 'YOUR LIFE, PERFECT BALANCE'

Bottler, the must-have onboard accessory for superyacht owners with a good taste for wine, appeared very useful at the 17th Monaco Yacht Show.

Bottler BV, a Dutch company, manufactures the ultimate onboard accessory to hold wine or champagne in ultimate balance, even when the vessel is in motion. Designed by a famous Dutch interior yacht designer, who was also responsible for the artist impressions and interior workshop drawings of the Paraffin. He was inspired by Gerolamo Cardano, the Italian physician, philosopher and mathematician, developed in 1537 his 'cardanic suspension' (gimbals), in order to hold the compass stably against the ships movements. It concerns of three concentric rings, in which the compass hangs always perpendicularly.

The Bottler is bespoke, manufactured by hand with watch-making precision and can be custom designed to match any interior. Price starts as from €5.000

About Princess Iolanthe

The handcrafted Bottler was very useful serving Champagne on board of the sleek and stylish, Italian 150-foot motoryacht Princess Iolanthe. The Princess Iolanthe is characterised by unusual spacious guest areas: airy and extremely comfortable. The yacht has a 30-foot beam, which means she's wide for her length and feels more voluminous inside than some other yachts her size.

About the 17th Monaco Yacht Show

The Monaco Yacht Show is renowned throughout the sector for being the show that must not be missed in the luxury yachting sector because it is the only yacht show exclusively devoted to Superyachts of at least 25 meters in length.
